

I would like to express my experience as visiting student in the department of surgery at AUB medical center; it was very interesting and beneficial. Moreover, I had the chance to judge this department at an approximate level:

I found out that there was a good systematic and organized work which I believe will lead to a remarkable graduate achievement.

As for me, I spent a whole month in the Department of General Surgery, where 2 weeks were dedicated for vascular team and the other 2 for pediatric one, including my participation in the operating room.

Furthermore, I gained knowledge from attending many conferences, plus I enjoyed the acquaintances that I made during my visit.

Thank you for your interest and consideration.

Houssein Haidar-Ahmad

Lebanese University

April 3 – 30, 2006

Rotated in the Division of General Surgery (Vascular and Pediatric)
