

I really spent wonderful weeks in the department, all are lovely, willing to help from the first day to the final day. I found a new family surrounding me, I learned a lot about new procedures in the Neurosurgery field with highly expert professors. I recommend every one, who wants to know how to feel the meaning of a busy rotation and being active all the time, to apply for this division.

Finally, I want to thank all the friends who helped me within these days starting with the friends in the department's office and ending with the nurses in the floors.

P.S.: I really recommend changing the rules and give the visiting students a beeper to make connecting them easier.
