

Sophie Kefi

Kings College London

I chose to do a one month elective at AUH rotation in surgery. I did two weeks in general pediatrics and two in plastic surgery.

My days started with a 7h00 wards round and finished at 4h00. I attended a wide variety of cases in the OR and was able to follow up the patients afterwards. I felt two weeks were enough time in each specialty to gain a good insight into them.

Overall I thoroughly enjoyed my time here, the working environment was pleasant and we managed to get a lot done in a day.

All the students and doctors were very warm and welcoming. Having never been to Lebanon, I would definitely come again. I have had a fantastic and valuable time.

**Rotated in the Divisions of General Surgery / Pediatrics and Plastic
July 25-Aug 19, 2005**
